TWO-WAY 45° SWITCH
The NOL-TEC Model 403 two-way switch is typically used to diverge or converge free-flowing, non-abrasive materials in a variety of pneumatic conveying applications.

STANDARD FEATURES:
- Pipe adapter and lateral of Sch. 40 pipe
- RV-style pinch valve with gum rubber elastomer
- Pressure switches

SPECIFICATIONS:
- Compressed air: Clean and dry at 100 PSIG for 60 PSI convey pressure
- Temperature range: -50° to +180° F
- Electrical: 24VDC

OPTIONAL FEATURES:
- Stainless steel product contact surfaces
- Food grade construction
- Wear-resistant construction
- Elastomer variations
- High-temperature rating up to 400° F
- Fail-safe controls
- Quick-open controls
- Vacuum controls
- Flanged or grooved pipe connections
- Purged off-leg
- Valve manufacturers vary
- Electrical: 110-120V; 50-60Hz
